The TTP within the Tropical Timber Trade Programme

LA RÉFÉRENCE EN MATIÈRE DE BOIS TROPICAL

The TTP project is part of the **Tropical Timber Trade Facility** programme implemented by ATIBT.

Overall objective:

Strengthen transparency, support regulatory compliance, and provide practical assistance to stakeholders across the entire timber value chain.

TTP UP-DATE : WHY NOW ?

The TTP: an existing and well-recognised tool

The context is evolving (EUDR, CITES, traceability, risk)

Make the portal more operational:
update of priority countries by a pool of experts, based on a common template

Countries concerned:

Cameroon / Gabon / Republic of the Congo / DRC / CAR / Equatorial Guinea / China

“We build on what already exists — we are not starting from scratch.”

WHAT IS THE TTP USED FOR TODAY ?

The TTP today:

- Country information on timber legality
- Reliable and comparable sources
- A reference tool for many stakeholders

“The question is not whether the TTP is useful, but how it can remain useful in the EUDR context.”

Next steps

20/02/2026: Adjustment of the template

March: Sent to country experts

May: Update of priority country profiles

May: Continued exchanges with users and testing

June: CIB workshops at the ATIBT stand

October: Presentation of the updated TTP

TEMPLATE

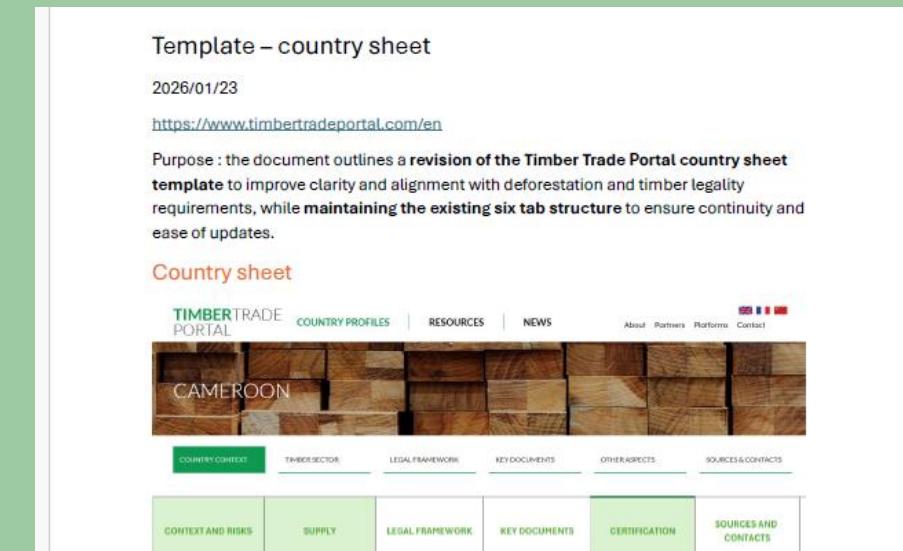

Template – country sheet

2026/01/23

<https://www.timbertradeportal.com/en>

Purpose : the document outlines a **revision of the Timber Trade Portal country sheet template** to improve clarity and alignment with deforestation and timber legality requirements, while **maintaining the existing six tab structure** to ensure continuity and ease of updates.

Country sheet

Proposed changes

It is proposed to **maintain the five existing tabs**, while revising the titles of three of them in order to make them more relevant in the context of **due diligence on deforestation and legality**.

This approach allows users to more clearly **understand where to find the relevant information**, while preserving the current logical structure of the Timber Trade Portal, thereby facilitating the **update of existing content**.

Current button	New title	Examples of content / questions addressed
Contexte forestier	Context and risks	Forest resources in Cameroon Indicators of resources and forest loss Risks level : Corruption Perceptions Index, Index of Public Integrity score, Timber Sourcing Hub risk score, Risk level resulting from the European Commission country benchmarking

What we take away from your discussions

Please use the chat.

Even immediate reactions are welcome:

Positive points

Areas for improvement

“Your feedback will directly feed into the next steps of the work.”
