Context

Certification in the Congo basin

- **4,2 million ha** certified sustainable management. **Surfaces loss (-1,2 Mo ha)**
- **5,3 million d'ha** certified Legality. **Increase (+2,3 Mo ha)**

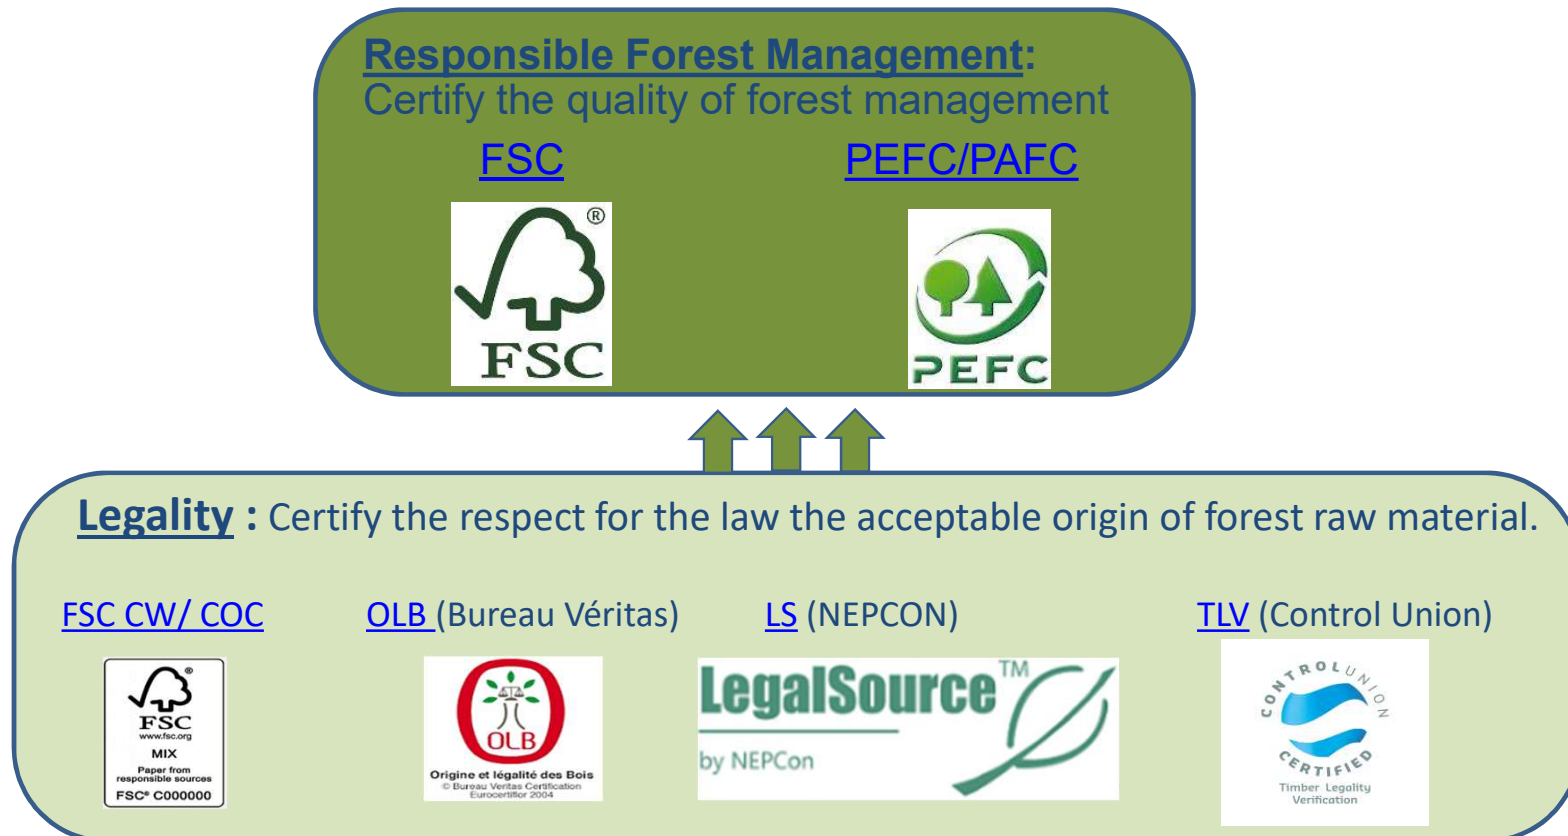

Causes

- **Lack of attractiveness** of the sustainable management certification + limited demand
- **Little return on investment:** not enough bonus for certified wood while the certification cost was estimated between 1 and 2€ per ha
- **A certain complexity of certain standards** and appearance of **new requirements particularly strong and impacting**
- Implementation of European wood regulations (March 13)

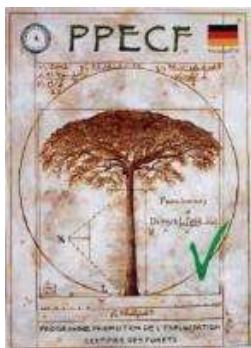

Context

The forest certification standards in Central Africa

- Established from **principles and criteria** on which, **the firms' conformity is checked** during the annual supervision audits, **by independent auditors.**

Objectives

Under the administrative supervision of **COMIFAC**
Funded by the German cooperation through the **KFW**
Implemented by **Ecoconsult/Oreade Brèche**

cover **5 forest countries** of Central Africa :
Cameroon, Gabon, DRC, Republic of the Congo, CRA

Three intervention axis:

- Establishment of **institutional conditions conducive to the certification**: *adaptation of the certification standards, forest mediation, normative framework, etc.*
- **Improvement of the industrial harvesting quality**: *trainings, prevention of corrective actions request*
- **Reinforcement of the communication** with local population, consumers, concessionnaires

Objectives

First part of the programme (June 2012- July 2017)

Support to sustainable management certified concessionaires to maintain their certificate.
Around 120 interventions realised in 5 years.

Second part of the programme (2017-2021) : opening of PPECF support to **Legality certificate checked third-party**. 38 interventions ongoing/achieved.

Justifications:

- The certificates of « Legality » comply with social and environmental international standards requirements
- The forest legislation of Central Africa is among the most demanding in the world.
